

## A/V & Equipment Rentals

You are welcome to provide your own LCD Projector, we will provide cabling and a screen, at no charge. Please note that we do not have A/V technicians on site, however our maintenance team can help get you started. Please let us know if you are using a MAC product at the time of booking, so appropriate connections are provided. We do not provide a conference bridge or call in service.

If you require a more complex set-up, such as more than four microphones, an operating technician, video, or items not listed, we can refer you to our preferred partner, Inland Audio Visual. There is no charge for bringing a supplier of your choosing.
